DATASHEET

NanoBeam® M

High-Performance airMAX® Bridge Models: NBE-M2-13, NBE-M5-16, NBE-M5-19

Uniform Beamwidth Maximizes Noise Immunity

Innovative Mechanical Design

High-Speed Processor for Superior Performance

Overview

Starting with the first-generation NanoBridge®, Ubiquiti Networks pioneered the all-in-one design for an airMAX® product functioning as a CPE (Customer Premises Equipment). Now Ubiquiti Networks launches the latest generation of CPE, the NanoBeam®.

Improved Noise Immunity

Available for the 2.4 and 5 GHz frequency bands, the NanoBeam directs RF energy in a tighter beamwidth. With the focus in one direction, the NanoBeam blocks or spatially filters out noise, so noise immunity is improved. This feature is especially important in an area crowded with other RF signals of the same or similar frequency.

Integrated Design

The Ubiquiti® Research and Development team combined the radio and antenna to create a more efficient and compact CPE. The NanoBeam gets maximum gain out of the smallest footprint.

Providing increased performance from its faster processor and innovative mechanical design at a low cost, the NanoBeam is extremely versatile and cost-effective to deploy.

airMAX Technology Included

Unlike standard Wi-Fi protocol, Ubiquiti's Time Division Multiple Access (TDMA) airMAX protocol allows each client to send and receive data using pre-designated time slots scheduled by an intelligent AP controller.

This time slot method eliminates hidden node collisions and maximizes airtime efficiency. It provides significant performance improvements in latency, throughput, and scalability compared to all other outdoor systems in its class.

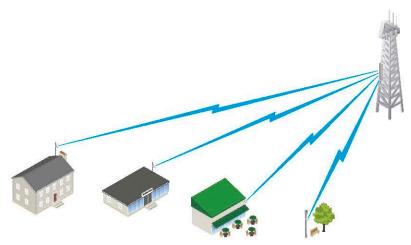

Intelligent QoS Priority is given to voice/video for seamless streaming.

Scalability High capacity and scalability.

Long Distance Capable of high-speed, carrier-class links.

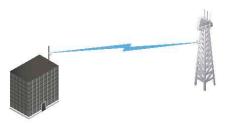

Application Examples

PtMP Client Links

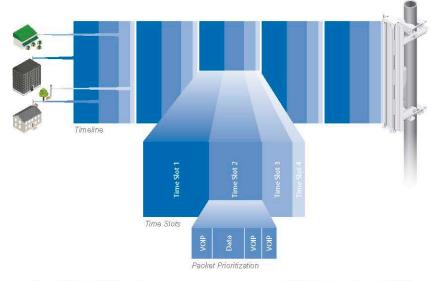

The NanoBeam used as a CPE device for each client in an airMAX PtMP network.

PtP Link

Use a NanoBeam on each side of a PtP link.

airMAX TDMA Technology

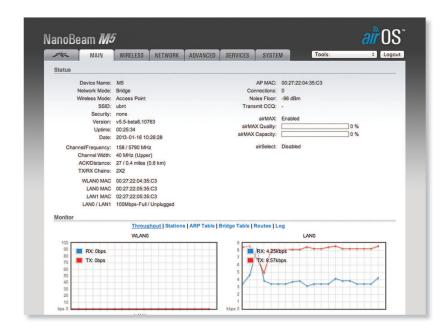

Up to 100 airMAX stations can be connected to an airMAX Sector; four airMAX stations are shown to illustrate the general concept.

Software

airOS°

airOS® is an intuitive, versatile, highly developed Ubiquiti firmware technology. It is exceptionally intuitive and was designed to require no training to operate. Behind the user interface is a powerful firmware architecture, which enables high-performance, outdoor multi-point networking.

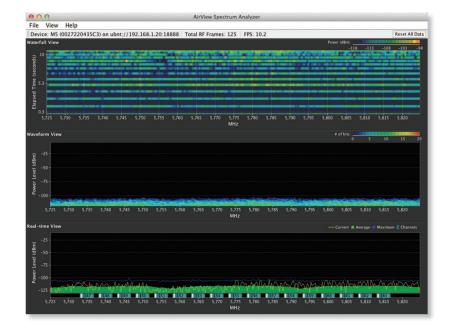

- Protocol Support
- Ubiquiti Channelization
- Spectral Width Adjustment
- ACK Auto-Timing
- AAP Technology
- Multi-Language Support

airView®

Integrated on all Ubiquiti M products, airView® provides advanced spectrum analyzer functionality: waterfall, waveform, and real-time spectral views allow operators to identify noise signatures and plan their networks to minimize noise interference.

- Waterfall Aggregate energy over time for each frequency.
- Waveform Aggregate energy collected.
- Real-time Energy is shown in real time as a function of frequency.
- Recording Automate airView to record and report results.

air Control

airControl® is a powerful and intuitive, web-based server network management application, which allows operators to centrally manage entire networks of Ubiquiti devices.

- Network Map
- Monitor Device Status
- Mass Firmware Upgrade
- Web UI Access
- · Manage Groups of Devices
- Task Scheduling

Hardware Overview

Innovative Mechanical Design

- All-in-one design The NanoBeam provides both the radio and antenna in the smallest possible footprint.
- Quick and easy installation No fasteners are required for pole-mounting, and a single wall fastener (not included) is required for wall-mounting.
- Convenient alignment The NanoBeam pivots on its ball joint for easy aiming.

Compact Form Factor

- Efficient footprint The radio and antenna are combined into a single body that takes up minimal space.
- Versatile mounting The NanoBeam can be mounted in almost any position needed for line of sight.
- Aesthetics The NanoBeam is small enough to blend discreetly into the background at a customer's location.

NBE-M5-19 with Mounting Hardware

Optional Isolator Shield Accessory

IsoBeam*

Model	NBE-M2-13	NBE-M5-16	NBE-M5-19
ISO-BEAM-16		✓	
ISO-BEAM-19	✓		✓

An RF isolator shield is available as an optional accessory to enhance signal isolation.

Installation Using the IsoBeam™

Optional Mounting Accessories

NanoBeam[®] Wall Mount Kit

Model	NBE-M2-13	NBE-M5-16	NBE-M5-19	
NBE-WMK	✓	✓	✓	

A wall mount kit is available as an optional accessory to enhance stability for wall-mounting.

Installation Using the NanoBeam Wall Mount Kit

NanoBeam[®] Window Mount

Model	NBE-M2-13	NBE-M5-16	NBE-M5-19	
NBE-16-WM		✓		
NBE-19-WM	✓		✓	

A suction cup mount is available as an optional accessory to mount the NanoBeam on a window.

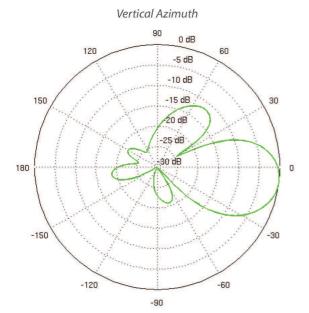

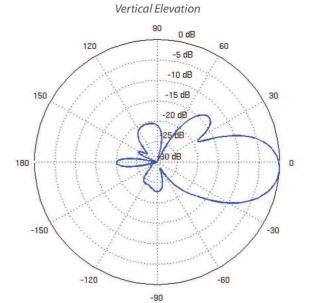

Installation Using the NanoBeam Window Mount

Specifications

		NBE-M5-	16		
Dimensions				140 x 140 x 54	mm (5.51 × 5.51 × 2.13")
Weight					0.320 kg (0.71 lb)
Power Supply					24 V , 0.5 A PoE
Max. Power Consumption					6W
Operating Frequency	Worldwide	USA: U-NII-1	USA: U-NII-2A	USA: U-NII-2C	USA: U-NII-3
	51 50 - 5875 MHz	51 50 - 5250 MHz*	5250 - 5350 MHz*	5470 - 5725 MHz*	5725 - 5850 MHz*
Gain			·		16 dB
Networking Interface				į,	(1) 10/100 Ethernet Port
Processor Specs				Athe	ros MIPS 74Kc, 560 MHz
Memory				(64 MB DDR2, 8 MB Flash
LEDs				(1) P	ower, (1) LAN, (4) WLAN
Signal Strength LEDs	Software-Adjustable to Correspond to Custom RSSI Levels				
Max. VSWR					1.5:1
Channel Sizes	5/8/10/20/30/40 MHz				
Polarization					Dual Linea
Enclosure				Outdo	oor UV Stabilized Plastic
Mounting				Pole-Mount (Ki	t Included), Wall-Moun
Wind Loading				21.4 N @ 200 ki	m/h (4.8 lbf @ 125 mph)
Wind Survivability					200 km/h (125 mph)
ESD/EMP Protection				Air: ±	: 24 kV, Contact: ± 24 kV
Operating Temperature				-40	0 to 70° C (-40 to 158° F)
Operating Humidity				.5	to 95% Noncondensing
Wireless Approvals					FCC, IC, CE
RoHS Compliance					Yes
Salt Fog Test			IEC 68-2-11 (ASTM	B117), Equivalent: MIL-S	TD-810 G Method 509.5
Vibration Test					IEC 68-2-6
Temperature Shock Test					IEC 68-2-14
UV Test			IEC 68-	-2-5 at 40° C (104° F), Equ	ivalent: ETS 300 019-1-4
Wind-Driven Rain Test			ETS 300 0	19-1-4, Equivalent: MIL-S	TD-810 G Method 506.5
